PROFILE

A developer and an infrastructure engineer: servers, access, networking and monitoring for the things that must not fall over. Security is already part of the work rather than an intention — access role models and protected branches in GitLab, centralised accounts on FreeIPA, incident response. I want to move into DevSecOps and build the checks into CI/CD and the SSDLC, and my degree covers exactly that.

CORE SKILLS

Infrastructure: Linux, vSphere, Docker, Kubernetes (RKE2), Rancher, Nginx, HAProxy

Automation & access: Terraform, Ansible, FreeIPA

Observability: Prometheus, Grafana

Development: Go, Flutter, Angular, PrimeNG, .NET, PostgreSQL

Languages: English B2, Russian C2, Tajik C2, Uzbek A2

EXPERIENCE

Middle DevOps/SRE · OJSC "Bank Eskhata"

Jan 2026 - present

- Design and improve the bank's infrastructure so critical services remain stable, predictable, and secure.
- Automate deployments with Ansible and Docker, standardize services, and develop monitoring and alerting with Prometheus and Grafana.
- Own the lifecycle of server environments and core services, including performance tuning, capacity planning, release support, and incident resolution.
- Run access role models, protected branches and pipelines in GitLab CI/CD, and centralise accounts on FreeIPA.

Junior DevOps/SRE · OJSC "Bank Eskhata"

Jul 2025 - Jan 2026

- Automated server deployment and configuration with Ansible and SemaphoreUI.
- Set up Prometheus and Grafana monitoring, analyzed metrics, and removed bottlenecks.
- Provisioned and supported server environments, optimized performance, and worked with development and employee teams.
- Automated virtual machine provisioning with Terraform, Ansible and FreeIPA, and stood up a Kubernetes platform on RKE2 and Rancher.

IT Technician · Behdoshti Ltd

Oct 2024 - Jun 2025

- Assembled and maintained computers, installed networks, and kept them operational.
- Configured network, computer, and medical equipment.
- Trained employees to use computers and software, provided IT support, and performed on-site repairs.

PROJECTS

Commercial products, more than ten of them: NJ-Cosmetics.com, imongroup.com, EliteBurger.online, AziziMoliya.com, ChicagoBurger.tj, Safo Pharmacy (safo.mubi.dev), and others that are under NDA or not worth the space.

Alongside the commercial work I keep pet projects fully open source under AGPL: AFK4.NET, a complete management system for internet cafes, and ManClient, a booking service for businesses and their customers. Six more are on my GitHub page.

EDUCATION

Moscow Financial and Industrial University

Sep 2021 - Dec 2025

Bachelor's degree in Information Systems Development, Maintenance and Security

CERTIFICATES

Kaspersky Academy — Cybersecurity Certification — cybersecurity course

Oct 2021
